

VOYAGER

Thank you for your purchase!

Here is your new Digital Sputnik Voyager - a revolutionary tool that puts professional-grade lighting solutions in the hands of all filmmakers - regardless of their experience or budget. The DS Voyager has been created by filmmakers for film-makers. With years of experience from the biggest sets around the world.

What is included?

Voyager system

AC/DC converter

Power cable C13

Diffuser tube

Voyager mount

Quick-start guide

Here are some quick steps to get you started with your new device.

When booting up your Voyager for the first time, the unit has to be connected to a power supply.

NB! THE UNIT WILL NOT BOOT UP WITHOUT BEING CONNECTED TO A POWER SUPPLY!

Once connected to the power supply, push and hold the Power button until the first LED turns green.

The unit will then start the boot-up process which can last up to a minute. The unit is ready to be used when the third LED turns yellow.

Connecting your smart device to your Voyager

Please check the bottom of your Voyager for a unique SSID tag - this is the name of the Wifi network for your Voyager. To connect your smart device to the Voyager, connect it to the devices Wifi network - the password is ***dsputnik***.
